CONSIGLI PER LA POSA IN OPERA

I pavimenti in gres porcellanato (materiale ad alta resistenza) comportano **leggere differenze di tonalità e calibro** che **non danno motivo di contestazione a posa effettuata**. E' quindi consigliabile verificare il materiale a secco prima della posa in opera. Le tonalità dei campioni sono sempre indicative. Per la posa in opera è consigliata una **fuga di almeno 5 mm.** con l'utilizzo delle normali crocette distanziatrici.

WARNING

Porcelain stoneware (high resistant material) can be subject to differences of colour shades that cannot be object of dispute after laying. **Therefore it is advisable to check the materials before laying.** The colour shades of the final products might slightly differ from the samples. For laying the tiles it is recommended **to keep at least 5 mm. between the tiles** using normal spaces.
